MAINAIMS

Computerize Your Business

We @ Duke IT

Information is the key to success. The more we know the more we grow. We, at Duke IT follow this basic principle since the day we began our activities. Along with our products and services we enjoy sharing the knowledge to our clients.

The urge of educating people encourages us to provide accurate Business Software Solutions for our clients. We configure software solutions such a way that they become integral and essential part of their system and that too without much change to it

We provide full-cycle services in the areas of software development, web-based enterprise solutions, web application and portal development. Combining our solid business domain experience, technical expertise, profound knowledge of latest industry trends and quality-driven delivery model we offer progressive end-to-end web solutions.

We provide scalable business solutions that help clients driving business value from technology investments and capitalize on increased sales opportunities, cost efficiencies, new revenue streams generation and enhanced communication with customers, partners, suppliers and employees.

Our Growth

Technology plays the major role in our success. Since day one we encourage our developers to innovate new ways of easing our clients task in their day to day business activities. And we are proud to introduce our innovation AIMS. AIMS is developed to minimize the time and efforts in software development to provide extremely fast and bug free business applications to our clients.

Every research Every Technology is useless until its useful to people. With AIMS we develop very cost effective CRM and ERP Solutions for our clients. These applications help our clients to maintain the most tedious data during their business processes. In near future we eye to make this technology reach maximum number of people. So our journey will continue till every single entity in business world is touched by AIMS.

We started with website development along with social marketing and networking services. Customer Satisfaction is our only mission in business and at Duke IT we starve ourselves to live up to our client's expectations

Computerize Your Business

AIMS – The Technology

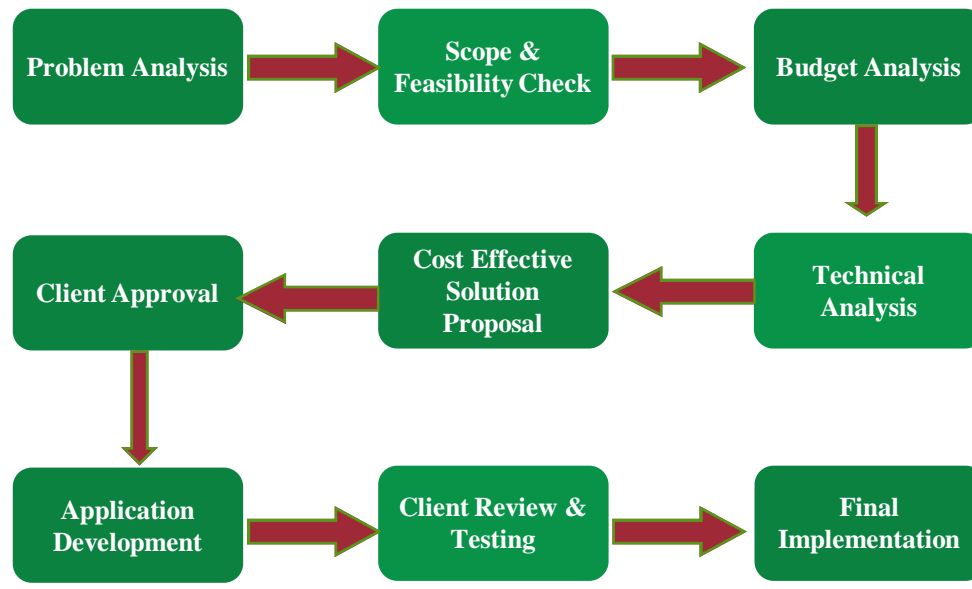

Years of Development has led to innovative programming abilities which emerged to show case better software's. This has led to rapid changes in software industry making present software's unusable in future. Software's are not able to face the ravages of time and fail to satisfy customers in a short span of time. Software's developed in any programming language becomes obsolete and is treated as a legacy system.

Our brain child **AIMS - Artificial Intelligent Management System** allows to develop critical Business software with ease and at most accuracy .It's an Enterprise Solution for Development of Business Applications which has given us momentum to fixed growth through various businesses.

How We Work?

We work as per our client's convenience. The process is very simple.

During all above stages our client is at center stage. We make sure that the final output always satisfies our client and is implemented successfully.
